### **Comview announces opening of its new Canadian Data Center**

**Comview's Canadian Data Center was established to serve the needs of Clients in Canada who want in-country data storage and access.**

**Huntington Station, NY** – October 5, 2009 – Comview Corporation, a leading provider of telecom expense management services, announced today that it has opened a new Canadian Data Center to support its web-based telecom expense management solutions and to meet the needs of Canadian clients who have expressed a desire in having their critical business data stored within the boundaries of their own country. Comview expects clients in Canada to benefit greatly from this new facility.

Comview is a leading provider of web-based telecom expense management solutions. The firm's flagship offering, Total Talk Management, combines Call Accounting and Wireless Management on a single platform. Comview was the first to offer Web-based Telecommunications Management Solutions beginning in 1999. Comview was early in the TEM market as well, working with customers as early as 2002 to provide enterprise TEM solutions for voice, data and wireless services through its association and partnership with industry leaders.

"We are thrilled to offer this additional benefit to our Canadian clients," said Perri. "This addition to our service offerings goes to the heart of our customer for life philosophy and is an important step in expanding our presence globally," he added.

Comview, recognizing the growing demand for in country storage of sensitive data, has embarked on a plan to develop data centers in the countries it serves -- Canada is the first outside the US market. The new facility features all that is expected with a high-end hosting environment, including; exceptional environmental controls, advanced firewalls, encryption, intrusion detection and other security measures, as well as a fully redundant network and comprehensive back-up procedures.

#### **About Comview Corporation**

Comview unlocks the value hidden in business communication expense. Comview's products and services allow businesses of all sizes to recognize the waste in

communications use and spend and to realize the savings associated with making strategic changes to existing contracted carrier services. Founded in 1997, Comview's products and services encompass a broad range of communication platforms including: Wireless, PBX, VoIP, Conferencing and more. The company's flagship offering, Total Talk Management, provides decision insight that comes from a single view across all voice communication platforms and contracts. Comview's services are used by major organizations throughout the U.S. and abroad.
