Comview wins Long Island Software Award for 2010

Huntington Station, NY – May 5, 2010 – Comview Corporation, a leading provider of telecom expense management services, announced today that it has won the LISA (Long Island Software Award) for 2010 for its new and innovative Business Intelligence module as part of its Total Talk Management suite.

The Long Island Software Award is sponsored by LISTNET (Long Island Software and Technology Network, www.listnet.org), a non profit organization, who's mission is to promote Long Island as one of the national centers of excellence for Software and Technology solutions. Each year, LISTNET solicits new software and technology products for consideration for its prestigious LISA Awards competition. Peter Goldsmith, Chairman of LISTNET said "Comview is a prime example of a LI Tech company that creates and sells software that is leading edge. We are proud to have them as one of our 2010 LISA winners"

Comview's new Business Intelligence Module contains powerful features including the ability to create an unlimited number of dashboard "widgets" including charts, KPIs and exceptions. Custom charts can be created in seconds and a pre-made library of the most common charts is included. Comview also provides a data mining tool that allows more experienced users to sort and analyze the data in virtually any manner required. For example, a user can trend international usage from a single department using a single carrier over the last six months, identifying cost, minutes, volume of calls, voice only, data only, or everything. All charts can be copied into presentations and exported to Excel.

Comview is a leading provider of web-based telecom expense management solutions. The firm's flagship offering, Total Talk Management, combines Call Accounting and Wireless Management on a single platform. Comview was the first to offer Web-based Telecommunications Management Solutions beginning in 1999. Comview was early in the TEM market as well, working with customers as early as 2002 to provide enterprise TEM solutions for voice, data and wireless services through its association and partnership with industry leaders.

About Comview Corporation

Comview unlocks the value hidden in business communication expense. Comview's products and services allow businesses of all sizes to recognize the waste in communications use and spend and to realize the savings associated with making strategic changes to existing contracted carrier services. Founded in 1997, Comview's products and services encompass a broad range of communication platforms including: Wireless, PBX, VoIP, Conferencing and more. The company's flagship offering, Total Talk Management, provides decision insight that comes from a single view across all voice communication platforms and contracts. Comview's services are used by major organizations throughout the U.S. and abroad. For additional information about Comview, visit their website at www.comviewcorp.com or call 631-935-1901.
