Comview Extends its Popular Telecom Expense Management Webinar Series

Series led by industry visionary Joe Basili will focus on most popular challenges as voted by telecom expense management professionals.

Huntington Station, NY – February 1, 2010 – Comview Corporation, a leading provider of telecom expense management services, announced today that it will be extending its popular Telecom Expense Management Webinar Series, adding three more webinars. The latest additions are squarely focused on the most pressing challenges facing telecom expense management (TEM) professionals and their companies as voted on during the three prior events.

The webinars, led by Joe Basili, President and Research Director of Network Trends Now and Managing Director for the Telecom Expense Management Industry Association (TEMIA), cover topics seen as the biggest hurdles moving into 2010.

“We are pleased to be able to present these additional webinars -- we think they will answer quite a few questions that our attendees have deemed most important to their companies and to them professionally. 2010 promises to add considerable complexity to the telecom management mix as handheld platform proliferation shifts into high gear,” said John Perri, Comview CEO “Over the past three months, we’ve listened to our clients as they describe their most pressing challenges, the topics we selected map to those top challenges,” Perri added.

The first webinar, scheduled for February 25, 2010 at 12:00 Noon EDT, is How to Create a Mobile Policy including an understanding of the steps needed to creating an effective policy in today’s rapidly changing marketplace. The information covered is for executives trying to decide what to do and operations teams that are dealing with this issue today.

Other scheduled webinar topics include The Battle of the Smartphones, scheduled for Thursday March 25, 2010 at 12:00 Noon (EDT) and Best Practices for Managing Mobility in 2010, scheduled for Thursday April 22, 2010 at 12:00 Noon (EDT).

Registration for any of the webinars has been made available on the company's website, www.comviewcorp.com.

Comview is a leading provider of web-based telecom expense management solutions. The firm's flagship offering, Total Talk Management, combines Call Accounting and Wireless Management on a single platform. Comview was the first to offer Web-based Telecommunications Management Solutions beginning in 1999. Comview was early in the TEM market as well, working with customers as early as 2002 to provide enterprise TEM solutions for voice, data and wireless services through its association and partnership with industry leaders.

About Comview Corporation

Comview unlocks the value hidden in business communication expense. Comview's products and services allow businesses of all sizes to recognize the waste in communications use and spend and to realize the savings associated with making strategic changes to existing contracted carrier services. Founded in 1997, Comview's products and services encompass a broad range of communication platforms including: Wireless, PBX, VoIP, Conferencing and more. The company's flagship offering, Total Talk Management, provides decision insight that comes from a single view across all voice communication platforms and contracts.
