Comview's Senior Software Developer Receives Twenty Top Techies Award from LISTnet for 2008

Paul Knorr selected for his extensive software improvements and team leadership

Huntington Station, NY, December 2008 -- Comview Corporation, a leading provider of telecom cost management services, has announced that their Senior Software Developer, Paul Knorr, has received the prestigious Twenty Top Techies Award from LISTnet. The December 9th award ceremony dinner took place at the Garden City Hotel.

"Paul joined Comview in August 2007 and it was just in time", said John Perri, President of Comview Corporation. "His extensive knowledge of advanced SQL eliminated bottlenecks throughout our system. Paul took SQL queries that required 15 minutes to run and tuned or rewrote them to run in 15 seconds. He spent the first few months rewriting many of these queries and generally increased performance 10 to 100 times, thus eliminating the need for faster hardware."

Perri added, "He also quickly picked up maintenance of a system with five man years of development and within a few weeks was up to speed on the bulk of it despite less than stellar documentation. Paul has since been responsible for three major new releases of our software including many front end customer interfacing capabilities."

"Paul has also created development standards, updated our Source Safe system and created system level documentation to make it easier for new hires. You can see why he was chosen by ListNet for this prestigious award," Perri declared.

Comview Corporation

Founded in 1997, Comview Corporation is a leading provider of telecom cost management services. Comview takes the hassle out of telecommunications management by providing outsourced Web-based Call Accounting and Wireless Management, Comprehensive Audit, and related services. Comview saves its customers substantial day-to-day management time and reduces telecom operating expenses. Its services are used by major organizations throughout the U.S. and abroad. For additional information about Comview, visit their Web site at <http://www.comviewcorp.com> or call 800-864-9094.

LISTnet

The objective of LISTnet is to promote Long Island as one of the national centers of excellence for Software and Technology solutions. This is achieved by facilitating collaborations between companies, establishing forums and events for the exchange of information, improving the quantity of the labor force and partnering with companies that provide the High technology Centers necessary for the growth of L.I. software and technology companies.
