Comview Corporation Joins Black Box Network Services Partner Program

Huntington Station, NY – Comview Corporation, a leading provider of telecom cost management services, has announced that it has expanded its marketing relationships by entering into a Partner Agreement with Black Box Network Services, Lawrence, Pennsylvania. The partnership marries Comview's proven solutions with Black Box's industry-leading sales and service capabilities. The two companies will collaborate to ensure their customers receive the best solutions for their specific needs and requirements.

Over the years, Comview Corporation worked with Black Box in a parallel mode; each company individually providing their technology solutions to the same customer. With the signing of the Partner Agreement, the relationship is formalized, thus assuring their mutual customers the benefit of an integrated program and product.

Comview Corporation sought out Black Box to partner with because of their excellent reputation in the world of digital business telephone systems. Black Box, in turn, sought out Comview because of the company's managed service and customer focused approach. Recognizing the benefits of Comview's full range of telecom management services, both wire line and wireless, Black Box initiated the Agreement to bring the Comview products to their customers. This shared commitment provides solutions and services to the customer by reducing costs, increasing productivity, and helping businesses become more competitive in the marketplace.

The Black Box Partner Program is a mutually beneficial relationship between Black Box and select vendors. This relationship encompasses the collaboration of sales and marketing efforts to supply a wide range of business solutions to the customer. John Perri, President of Comview Corporation states, "Black Box has a quality reputation as a nationwide provider of end-to-end communications solutions for organizations of all types and sizes. We're very pleased to be working closely with them and know that their customers will benefit from this relationship."

Comview Corporation

Founded in 1997, Comview Corporation is a leading provider of telecom and cost management services. Comview takes the hassle out of telecommunications management by providing outsourced web-based Call Accounting, Comprehensive Audit, Web-based Wireless Management and related services. Comview saves its customers substantial day-to-day management time and reduces telecom operating expenses. Its services are used by major organizations throughout the U.S. and abroad.
