12-month Sales Growth of 25% Recorded by Comview Corporation

*June 30th year-end results show 5th consecutive year
of greater than 20% growth*

Huntington NY-- Comview Corporation, a leading provider of telecom cost management services, has announced that their sales have increased 25% this year. Their June 30th year-end results show growth of greater than 20% for the 5th consecutive year. The 12-month sales increase is attributed to new customers, new business from major accounts, and the opening of a new sales office in Milwaukee.

"Our continued sales growth and extremely high customer retention rate results from our commitment to providing the best possible service and support," said John Perri, President of Comview Corporation. "We experienced significant growth in sales to our existing major accounts, including the New York City Board of Education and General Electric, as well as from several new customers, such as Bridgestone-Firestone, Swiss Re America, and Janney Montgomery Scott."

Comview profit increased 100% for the 12-month period ending June 30th. This notable increase in profit is attributed to the prior year's move to a new data center and the substantial increase in efficiency that resulted.

"We're very happy with last year's 25% sales growth," said Perri. "And, we anticipate similar growth next year. We'll get increased revenue from our new wireless cost management services and from the addition of sales people to our staff."

Comview Corporation

Founded in 1997, Comview Corporation is a leading provider of telecom cost management services. Comview takes the hassle out of telecommunications management by providing outsourced Web-based Call Accounting, Comprehensive Audit, Web-based Wireless Management, Telecom Invoice Processing, and related services. Comview saves its customers substantial day-to-day management time and reduces telecom operating expenses. Its services are used by major organizations throughout the U.S. and abroad.
