**Comview Corporation Inks Siemens Technology Partner Program Agreement**

Huntington Station, NY – Comview Corporation, a leading provider of telecom cost management services, has announced that they have entered into a Technology Partner Program Agreement with Siemens Corporation, Boca Raton, Florida.

Over the years, Comview Corporation worked with Siemens Corporation in a parallel mode; each company individually providing their technology solutions to the same customer. With the signing of the Siemens Technology Partner Agreement, the relationship is formalized, thus assuring their mutual customers the benefit of an integrated program and product.

Comview Corporation sought out Siemens to partner with because of their excellent reputation in the world of digital business telephone systems. Siemens, in turn, sought out Comview because of the company's managed service and customer focused approach. Recognizing the benefits of Comview's full range of telecom management services, both wire line and wireless, Siemens initiated the Agreement to bring the Comview products to their customers. In this way, both companies ensure a product mix that will provide the best solution to their customer's telecom needs.

Comview Corporation exhibits at Siemen's sales and road shows to bring its telecom cost management services to the attention of Siemen's customer base and sales representatives. John Perri, President of Comview Corporation states, "This partnership with Siemens has provided a boost in sales to our company while it has added a boost in confidence to Siemen's customers. It is a pleasure to work with one of the world's foremost telephone system companies."

**Comview Corporation**

Founded in 1997, Comview Corporation is a leading provider of telecom and cost management services. Comview takes the hassle out of telecommunications management by providing outsourced web-based Call Accounting, Comprehensive Audit, Web-based Wireless Management and related services. Comview saves its customers substantial day-to-day management time and reduces telecom operating expenses. Its services are used by major organizations throughout the U.S. and abroad.
